ZAKARIA ABID

Full Stack Developer | Web Applications, Python Automation & AI

Bouznika, Morocco • (+212) 7 06 08 03 06 • ziko442@gmail.com • linkedin.com/in/zakaria2abid • zaki442.github.io/portfolio

PROFILE

Full stack developer with 5 years of experience across the MERN stack, Angular, .NET, and Java Spring Boot, covering the full project lifecycle from requirements gathering through frontend, backend, and ongoing maintenance. Has expanded into Python, AI/automation, and systematic trading, including a self-built algorithmic trading system and a Python-based outreach automation tool. Comfortable working independently or in a team, with a growing focus on Linux fundamentals and cybersecurity. Fluent in French and English.

SKILLS

Web & App Development: JavaScript, TypeScript, Angular, React, Next.js, Node.js, .NET, Java, Spring Boot, MongoDB, Supabase

Python, AI & Automation: Python, machine learning fundamentals, workflow automation, AI-assisted ("vibe coding") development

Agile & Collaboration: Git, Jira, Agile/Scrum methodologies

Systems & Security: Linux, cybersecurity fundamentals

Other: Data analysis, problem-solving, teamwork & adaptability

Languages: French, English

PROFESSIONAL EXPERIENCE

Full Stack Developer | **Waitlistnow / Waitlisapp** · Freelance, Remote — **Jun 2026 – Jul 2026**

SaaS platform for creating waitlist landing pages

- Built Waitlisapp, a SaaS platform for creating beautiful waitlist landing pages, delivered end-to-end from design to a production-ready application.
- Developed with Next.js 14 (App Router), TypeScript, Tailwind CSS, shadcn/ui, Supabase (auth, database), Paddle (payments/subscriptions), and Resend (emails).
- Implemented waitlist management, an analytics dashboard, subscription billing, and deployment workflows.

Full Stack Developer | **Agile Bdarija Association (abd-project)** · Freelance, Morocco — **Jun 2026 – Jul 2026**

Web platform to showcase and manage association activities

- Built and delivered a web platform for Agile Bdarija Association to showcase and manage its activities.
- Developed with Next.js and TypeScript, with a focus on modern UI, content management, and responsive design.
- Collaborated with association stakeholders to gather requirements and deliver features aligned with community needs.

Full Stack Developer | **Onirique-Ride** · New York, remote — **Jan 2023 – Jul 2023**

Luxury chauffeur-service application

- Built a ride-hailing application on the MERN stack (MongoDB, Express, React, Node.js) for a New York luxury chauffeur service.
- Enabled customers to book rides, view trip history, and pay for trips directly within the app.

Full Stack Developer | **Leley Boutique LLC** — **Aug 2022 – Feb 2023**

Full-stack online bookstore platform

- Developed an online bookstore with Angular (frontend) and Java Spring Boot (backend).
- Implemented Stripe payment processing, login/registration, input validation, REST APIs, and JWT-based authentication.
- Delivered a products and stock management module ("Leley Management") covering requirements, design, and a working prototype through to final delivery; signed off by the client with positive feedback on quality and on-time delivery.

Full Stack Developer | **Bratil Consulting** · Full-time (CDI) — **Feb 2021 – Jul 2022**

.NET / Angular — report automation for technical inspection services

- Worked with .NET and Angular on a report-generation tool that automated technical report writing for Dekra inspection offices (bureaux de contrôle).

Full Stack Developer Intern | **Libens Consulting** — Jun 2020 – Jan 2021
Six-month internship — Java / Angular

- Delivered on all internship objectives using Java and Angular.

Full Stack Developer Intern | **FSAC** — Jan 2018 – Jan 2020
Internship — Java / Angular

- Delivered on all internship objectives using Java and Angular.

PERSONAL PROJECTS

Algorithmic Trading Bot | **Python, Alpaca API**

- Built a modular paper-trading system implementing a moving-average crossover strategy, structured into dedicated modules for configuration, exchange connectivity, strategy logic, and performance tracking.
- Currently extending the system with vectorbt and Backtrader for backtesting, TA-Lib and QuantStats for performance analysis, and ccxt for future crypto-market support.

LinkedIn Outreach Automation | **Python, SQLite**

- Built a connection-request management tool with rolling 7-day and ISO-week tracking logic, plus a daily quota redistribution system to safely manage outreach limits.

EDUCATION

Bachelor's Degree (Licence) in JEE & .NET Development — 2018 – 2019
Hassan II University — Faculté des Sciences Aïn Chock (FSAC)

Specialized Technician Diploma in Computer Development — 2017 – 2018
TSDI

Mathematics, Physics, Chemistry & Sciences — 2015 – 2016
Hassan II University

CERTIFICATIONS

- Python for Everybody Specialization (5 courses) — University of Michigan, Coursera — 2020
- Django for Everybody Specialization (4 courses) — University of Michigan, Coursera — 2021
- Machine Learning Specialization (3 courses) — Stanford University & DeepLearning.AI, Coursera — 2024–2025
- Agile with Atlassian Jira — Atlassian, Coursera — 2023
- Full Stack: Angular and Java Spring Boot E-Commerce Website — Udemy — 2022
- Python (Basic), Certified — HackerRank — 2024
- Additional self-paced coursework: Introduction to the Internet of Things and Embedded Systems (UC Irvine, Coursera); Spring Framework & Spring Boot, Java fundamentals, Data Structures, Front-End Web Development (Udemy); Kaggle micro-courses in Python, Pandas, SQL, Data Visualization, and Machine Learning.
